

RESTORE YOUR QUALITY OF LIFE WITH DENTAL IMPLANTS

Imagine sitting around a dining table that has four legs. In the middle of dinner, someone takes off one or two of the legs and, what remains, leads to a very unpleasant and disastrous experience.

When a tooth is missing from your mouth, the same scenario painfully plays out.

The difference? You simply can't walk away, but need to take action.

The absence of a single tooth may have grave consequence on your mouth and your overall well-being, including an uneven bite, increased cavities and joint problems, in addition to added stress to your other teeth.

Today in 2016, there has never been a safer and more effective time to have a dental implant. Simply put, anyone with a broken tooth beyond repair or who may be missing one or multiple teeth should turn to an implant as their first and immediate option.

With the seasoned and proven expertise of Dr. Yosreldin Koheil at Fredericksburg Dental Artists, you can have an implant one day and be back to your everyday routines within 24 hours.

A pure passion for dentistry runs in Dr. Koheil's genes – he is a second-generation dentist, with his father, mother, brother and sister-in-law all active in the field. He is currently pursuing Diplomate of American Board of General Dentistry, a prestigious designation achieved by less than one percent of U.S. dentists.

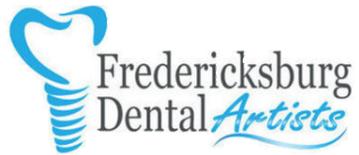

Trained at the world-renowned, best-in-class Misch Implant Institute, Dr. Koheil has perfected the art of implants throughout the last five-plus years. In addition to his expertise, he brings the highest level of care to each of his patients, seeing through each step from the

initial consultation well through follow-up appointments.

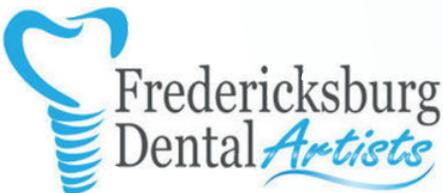

With Dr. Koheil, the implant journey begins with some of the most state-of-the-art dental technology available. Long before surgery begins, Dr. Koheil makes a 3-D map of every crevice of your mouth, ensuring a perfectly sized and placed implant come surgery time. This mapping guarantees the best possible dental outcome as well as virtually eliminates discomfort after the procedure.

Dr. Koheil uses the latest technology in dental implants, which are as much aesthetically pleasing as they are durable. Not only do they look just like your teeth, if maintained properly, dental implants can last a lifetime.

In addition to implants, Dr. Koheil provides Invisalign, root canal treatment, dentures, crowns and bridges, among other general dentistry procedures. For more information on Dr. Koheil and his services, please call 540-908-3888 or visit www.FredericksburgDentalArtists.com.
